## SUMMARY

- 5+ years of experience in backend DevOps
- Experienced in Java, Golang, Python, Web, currently learning C#
- Experienced in Spring framework, Mysql, Redis, MQ
- Experienced in Software Performance Improvement
- Experienced in Software Engineering
- Problem-solving, Team player, Easygoing, Love new things

## RECENT KEY PROJECTS

<b>Wechat QR Code Beautifier</b>	Pixel Fusion	2023.07-2023.09
<ul style="list-style-type: none"><li>• <b>Project Overview:</b> This is a Wechat QR Code beautifier project using the ability of AI.</li><li>• <b>My Role:</b> senior software engineer</li><li>• <b>Key Result:</b> The backend of this project must rely on an open-source project, which can generate different patterns of QR codes. The problem is that the open-source project is implemented in HTML and JavaScript, which means it can only run on a browser, not on a server. <b>At that time, no one has an idea except me.</b> I solved the problem shortly with Python packages, one is <b>Playwright</b> which is a web browser automatic tool, and another one is Fastapi, which provides restful API service.</li><li>• <b>Technical Keywords:</b> Golang, Python, Playwright, QRcode</li></ul>		
<b>Yulebao crowdfunding project</b>	Alibaba	2018.05-2020.03
<ul style="list-style-type: none"><li>• <b>Project Overview:</b> It's a crowdfund system in the entertainment industry. People can invest some money in an entertaining project, like a movie. They will get payback after profiting from the market.</li><li>• <b>My Role:</b> senior software engineer</li><li>• <b>Key Result:</b> 1. A hundred million dollars have been trading annually on this system. 2. Completely experienced the process of the product from 1 to 100. 3. QPS from 10+ to 10000+, TPS from 10+ to 1000+</li><li>• <b>Technical Keywords:</b> Java, Spring, MQ, MySQL, Cache performance improvement</li></ul>		
<b>An IDEA Plugin for our team</b>	Alibaba	2019.10-2019.12
<ul style="list-style-type: none"><li>• <b>Project Overview:</b> This is a JetBrains IDEA plugin that provides a GUI for a customized Mybatis generator.</li><li>• <b>My Role:</b> The independent developer</li><li>• <b>Key Result:</b> 1. Most team members in our department started using it shortly. 2. Got an Alibaba incentive award</li><li>• <b>Technical Keywords:</b> Mybatis, GUI, IDEA plugin</li></ul>
